

# The Marshfield Advantage

handcrafted quality since 1944

1 Heavy duty sinuous back springs spaced closely together for maximum back support and comfort.

2 7/8" furniture grade hardwood plywood arms are attached with coated power fasteners and covered with heavy weight furniture board to shape curves.

3 Machine-tied, drop-in coil unit has coated stabilizers for increased seating support.

4 Heavier gauge coils around perimeter of the drop-in coil unit for support and balanced seating.

5 7/8" furniture-grade hardwood plywood composed of seven, 1/8" laminated, alternating grain layers provide stability and strength. There are less assembly joints assuring a stronger frame.

## comfort, support, and durability

### Additional Product Details

- Semi-attached and loose pillow backs feature encased fiber with sewn-in channels for maximum shape retention.
- 2.0 High-density seat cushions for long lasting support and comfort.
- Patented seating unit = frame-within-a-frame construction. U.S. Patent #5,232,266; Canadian Patent #2,021,817
